Applicants claim diarylethenes substituted an isoxazole group and method of preparation thereof. The closest prior art of record is to Mihinori et al, *Chem. Commun.*, 1996. Michinori et al teach diarylethene compounds that differ from the instantly claimed compounds in that the compounds of the prior art do not have 1,2-oxazole groups attached directly to the benzothiophene group. The prior art failed to teach or suggest the compounds as described in this application.

Any comments considered necessary by applicant must be submitted no later than the payment issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement for Reasons for Allowance."
